REPORT ON THE EXISTING CAPACITY IN THE FIELD OF WASTE MANAGEMENT IN SERBIA

College of Applied Technical Science Niš

Niš, January 2016.

INTRODUCTION

In relation to the main activities, outcomes and outputs of the WP1, we believe that it could be meaningful, for this working package and project in all, to do the overview of current issues in the field of waste management in Serbia and explore companies, and organizations in the public and private sector that perform activities in the fields of Waste Management.

The main contribution of this report could be recognized for the realization of the activity "1.2 Analyze the existing capacity in WM field in Serbia", but also outputs (data) from the report could be inputs for the other activities on the project. Report includes data for the approximately 1000 companies, organizations and associations, their main activities, contact details, etc.

In terms of methodology, the data were obtained by using the Internet and resources of project partners. In this sense, data were collected from:

- Serbian Environmental Protection Agency (SEPA) – we use database of Permits for waste management by type of permit and by type and index number of waste,
- Serbian Business Registers Agency (SBRA) – we took in mind all organisations/associations with the key words "recycle(ing)" and "waste" in their title (eng. and serb.),
- Serbian Recycling Association – that has 21 members.

In realization of this activity the main steps were: collecting data, analyzing data and writing report.

We have found very different companies, from those that have only one employee to companies that have years of experience and much more employees. It should not ignore the limitation that has affected the analysis – many organizations and associations haven't had web pages so it wasn't possible to conduct detailed examining in relation to their main activities and other details.

REVIEW OF CURRENT ISSUES IN THE FIELD OF WASTE MANAGEMENT IN SERBIA

According to the last census in 2011 in Serbia live 7,186,862 residents. Residents of Serbia generate a total of 2,130,000 t/y municipal solid waste, or 0.81 kg per capita per day [1].

The composition of municipal solid waste generated in Serbia is shown in Figure 1.

In Serbia in 2009 passed the Law on Waste Management and in the same year and the Law on packaging and packaging waste. Also in 2010 adopted National Waste Management Strategy for the period 2010 - 2019. From these documents originated 58 regulations that regulate the waste issues, of which 17 are relating to hazardous waste.

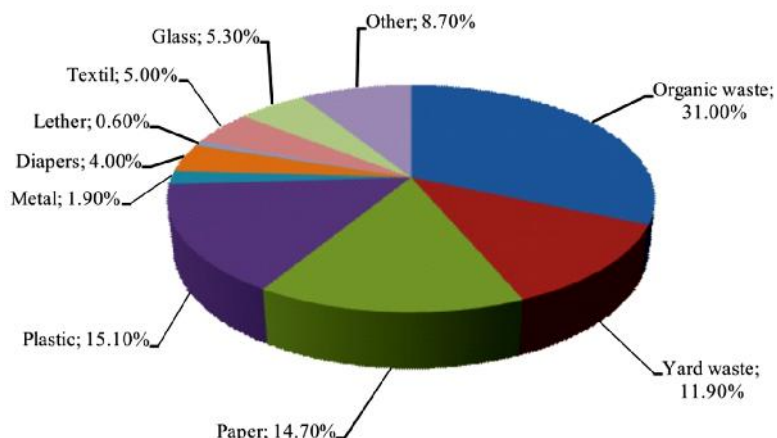

Figure 1 Composition of municipal solid waste in Serbia [1]

Industrial and commercial sector generate 6,124,981 t/y industrial wastes [1].

The institutional framework in the field of waste management in Serbia consists of Ministry of Agriculture and Environmental Protection, within there is Serbian Environmental Protection Agency - SEPA (<http://www.sepa.gov.rs>) to carry out technical tasks refer to the:

- Development, harmonization and management of the national information system for environmental protection (monitoring of the state of environmental media through environmental indicators, the registry of pollutants, etc.);
- Implement a national monitoring air and water quality, including the implementation of prescribed and harmonized programs for the control of air quality, surface water and groundwater aquifer and precipitation;
- Manage National Laboratory;
- Collection and integration of environmental data, their processing and preparation of reports on the state of the environment and implementation of environmental policy;
- Development of procedures for processing data on the environment and their evaluation;
- Keeping data on best available techniques and practices and their implementation in the field of environmental protection;
- Cooperation with the European Environment Agency (EEA) and the European Network for Information and Observation (EIONET), as well as other activities specified by law.

In the jurisdiction of the Ministry of Agriculture and Environmental Protection is the issuance of licensees for waste management.

Also in Serbia, there are 8 certified laboratories for testing of waste (Table 1) [2]. When it comes to territorial distribution, it is concluded that the 5 of them located in Belgrade, 2 in Novi Sad and 1 is located in Bor.

Table 1 Review of certified laboratories for testing of waste

	Laboratory	Address	City
1.	Gradski zavod za javno zdravlje , Centar za ekotoksikologiju, Jedinica za upravljanje otpadima, Laboratorija za karakterizaciju otpada	Bulevar Despota Stevana 54a	11000 Beograd
2.	MOL Beograd , Akcionarsko društvo za hemiju, biotehnologiju i konsalting	Batajnički put br.2, 11080 Beograd – Zemun, laboratory address: Nikole Tesle 15	22300 Stara Pazova
3.	Institut za zaštitu na radu a.d	Školska 3	21000 Novi Sad
4.	Anahem d.o.o, Laboratorija	Mocartova 10	11160 Beograd
5.	Institut za rudarstvo i metalurgiju Bor	Zeleni bulevar 35,	19210 Bor
6.	Institut Vatrogas d.o.o Zaštita od požara, bezbednosti i zdravlje na radu i zaštita životne sredine	Bulevar Vojvode Stepe 66,	21 000 Novi Sad
7.	Institut za ispitivanje materijala a.d.	Bulevar vojvode Mišića 43	11000 Beograd
8.	Elektrotehnički institut NIKOLA TESLA a.d	Koste Glavinića 8a	11000 Beograd

Current situation in Serbia is such that the Public Utility Companies (PUC) and several private companies are responsible for waste collection and transportation. About 80 % of generated municipal waste is collected, 85 – 90 % of collected waste is disposed, and 10 – 15 % of collected waste is recycled.

There are 7 sanitary landfills in Serbia: Jagodina, Leskovac, Kikinda, Lapovo, Pirot, Pančeno i Užice, and two landfills are in the process of permits obtaining.

According to information received by local municipalities, on their territory PUC landfilling the collected waste at 120 unsanitary landfills spread over 123 municipalities. Also, in Serbia there are 3,085 illegal landfills and dumps, and not any one landfill for hazardous waste [1].

Report of the Agency of Environmental Protection shows also the amount of waste from products which after use become special waste streams (Table 2) [1].

Table 2 Data on quantities of specific waste streams

Type of waste	Generated waste (t)	Disposed waste (t)	Treated waste (t)	Exported waste (t)	Imported waste (t)
E-waste	1,108.07	0.1	20,972.37	293.7	-
Wastes containing asbestos	1,542.20	1,647.07	-	-	-
Waste oil	13,777.72	-	10,135.72	-	-
Waste tires	6,862.72	-	28,766.40	-	781.17
Waste batteries	751.57	-	10,910.41	15,426.62	24.0
End-of-life vehicles	2,936.26	-	1,913.81	183.79	-

Based on the data of the Republic of Serbia has produced about 6,124,981 t/y of industrial waste. Of this 5,915,104 t have the character of non-hazardous waste, and 209,877 t of hazardous waste. The biggest waste producers are thermal power plants, the flying ash from coal is generated in the amount of 4,444,006 t, that representing 60% of total industrial waste (Table 3) [1].

Table 3 Recorded quantities of industrial waste by origin

Group	Activity during which the waste is generated	Amount of non-hazardous waste (t)	Amount of hazardous waste (t)
01	Wastes resulting from exploration, mining, quarrying, physical and chemical treatment of minerals	215,175	155,044
02	Wastes from agriculture, horticulture, aquaculture, forestry, hunting and fishing, food preparation and processing	314,728	3
03	Wastes from wood processing and the production of panels and furniture, pulp, paper and cardboard	26,395	
04	Wastes from the leather, fur and textile industries	171,357	
05	Wastes from petroleum refining, natural gas purification and pyrolytic treatment of coal	36	5,537
06	Wastes from inorganic chemical processes	1,581	120
07	Wastes from organic chemical processes	5,216	1,421
08	Wastes from the manufacture, formulation, supply and use (MFSU) of coatings (paints, varnishes and vitreous enamels), sealants and printing inks	1,514	1,956
09	Wastes from photographic industry	162	1,038
10	Wastes from thermal processes	4,444,006	10,508
11	Wastes from chemical surface treatment and coating of metals and other materials; non-ferrous hydro-metallurgy	856	436
12	Wastes from shaping and physical and mechanical surface treatment of metals and plastics	50,981	909
13	Oil wastes and wastes of liquid fuels (except edible oils, 05 and 12)		11,962
14	Waste organic solvents, refrigerants and propellants (except 07 and 08)		88
15	Waste packaging; absorbents, wiping cloths, filter materials and protective clothing not otherwise specified	86,271	1,428
16	Wastes not otherwise specified in the list	35,001	11,690
17	Construction and demolition wastes (including excavated soil from contaminated sites)	207,993	2,299
18	Wastes from human or animal health care and/or related research (except kitchen and restaurant wastes not arising from immediate health care)	249	2,682
19	Wastes from waste management facilities, off-site waste water treatment plants and the preparation of water intended for human consumption and water for industrial use	282,351	1,227

Group	Activity during which the waste is generated	Amount of non-hazardous waste (t)	Amount of hazardous waste (t)
20	Municipal wastes (household waste and similar commercial, industrial and institutional wastes) including separately collected fractions	71,232	1,479
	Total	5,915,104	209,877

Figure 2 shows the way of handling industrial waste by character [1].

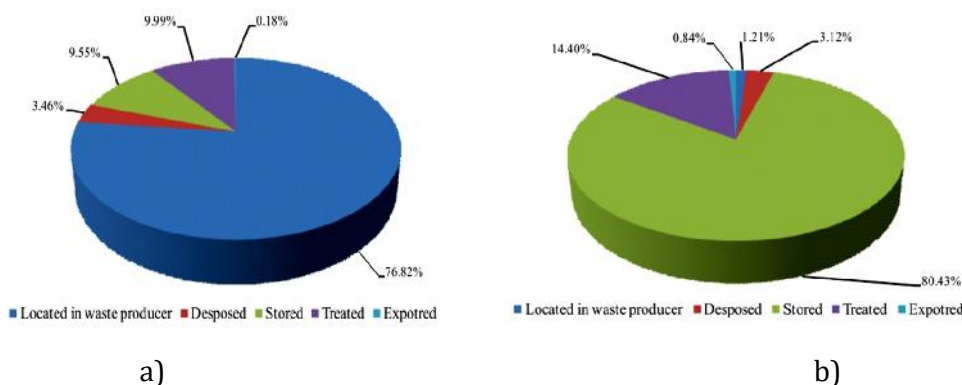

Figure 2 The way of handling industrial waste by character: a) Non-hazardous waste, b) Hazardous waste

REVIEW OF COMPANIES AND ASSOCIATIONS INVOLVED IN THE FIELD OF WASTE MANAGEMENT IN SERBIA

All companies and PUC engaged in waste management must obtain licenses for waste management of the relevant ministry. These licenses may be related to the collection, transportation, storage, treatment or disposal of hazardous and non-hazardous. So far, 2,267 licenses were issued for the collection, transportation, storage, treatment and disposal of waste, which is shown in Table 4 [3].

Table 4 Review of issued licenses

	Ministry			AP Vojvodina			Local municipal authority
	Total	Non-hazardous	Hazardous	Total	Non-hazardous	Hazardous	Non-hazardous
Collection	954	890	236	116	111	34	288
Transportation	1,175	1,108	250	127	124	33	288
Storage	128	103	89	89	78	43	524
Treatment	123	100	83	72	70	29	427
Disposal	4	4	2	2	1	2	31
Total number of licenses	1,361			174			732
Total	2,267						

As can be concluded from the Table 4, the highest number of licensees has been issued for the collection and transportation of waste. Operators with licensees for the storage of themselves (if they have permission to transportation) or in cooperation with carriers of waste, waste forwarded to operators with licensees for treatment, disposal or export of waste. These are companies with the most up to ten employees, of which half manual workers in the sorting and loading / unloading of waste.

35 companies have a license for waste disposal. Figure 3 presents review of location in Serbian territory of operators with licensees for waste disposal. In Appendix in Table 6 the review of operators with licensees for waste disposal is presented.

Figure 3 Territorial distribution of operators with licensees for waste disposal

562 companies have a license for waste treatment. In Appendix in Table 7 the review of operators with licensees for waste treatment is presented. Based on the analysis of territorial distribution it can be concluded that the most of the operators with license for waste treatment are located in the Belgrade region (30.60%), and at least of the operators is located in southern Serbia (13.35%). Table 5 presents a review of the territorial distribution of operators by region.

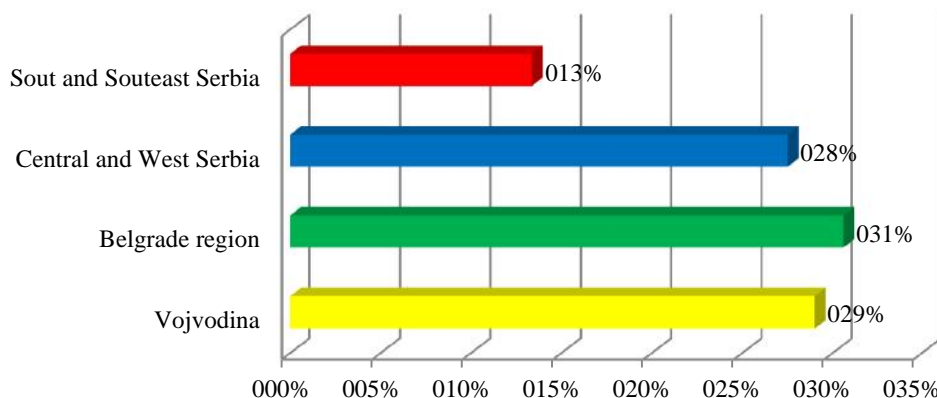

Figure 4 The rewiev of teritorial distribution of operators with license for waste treatment by region

Table 5 presents review of companies that have licenses for treatment of special waste streams.

Table 5 The review of companies that have licenses for treatment of special waste streams

Special waste streams	Number of companies
Waste tires	102
EE-waste	96
Waste batteries	60
Medical waste	57
Waste toner cartridges	45
Waste oil	21
Wastes containing asbestos	10
Wastes containing PCB	10
Waste fluorescent tubes	10
End-of-life vehicles	7
Wastes containing heavy metals	5

Tables 8-11 in Appendix presents review of companies that have licenses for treatment of special waste streams: waste tires, EE-waste, waste batteries, and medical waste. Figure 5 presents the review of the territorial distribution of operators with licenses for treatment of those waste streams by region.

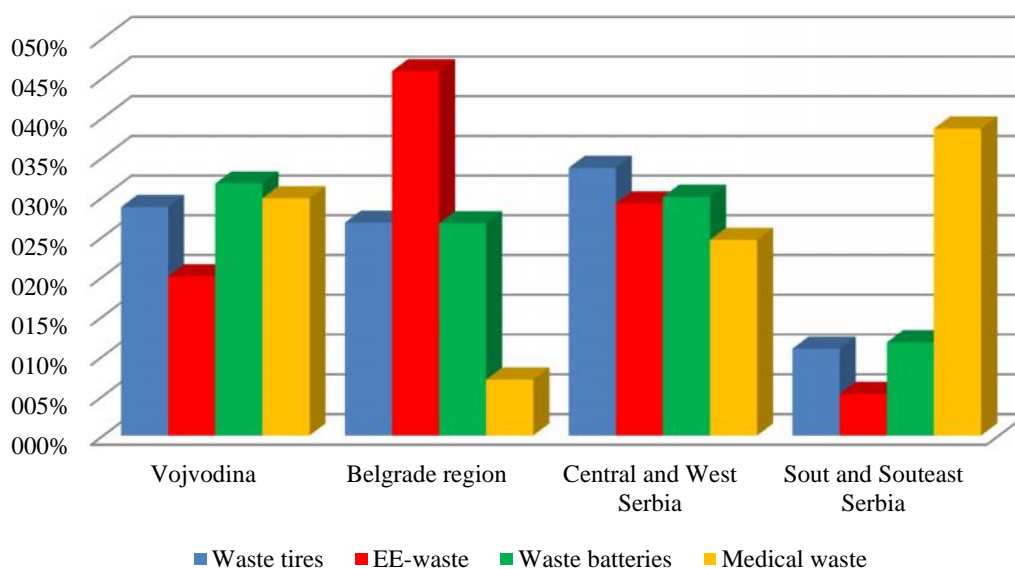

Figure 5 The review of the territorial distribution of operators with licenses for treatment of certain special waste streams by region.

Tables 12-18 in Appendix presents review of companies that have licenses for treatment of special waste streams: waste toner cartridges, waste oil, wastes containing asbestos,

wastes containing PCB, waste fluorescent tubes, end-of-life vehicles, and wastes containing heavy metals. Figure 6 presents the review of the territorial distribution of operators with licenses for treatment of those waste streams by region. Analyzing territorial distribution of operators with licenses for treatment of those waste streams, it can be concluded that the most operators are located in northern Serbia (Belgrade, Novi Sad, Valjevo, Kikinda and Sombor) and only a few of them are located in southern Serbia, mostly in Niš.

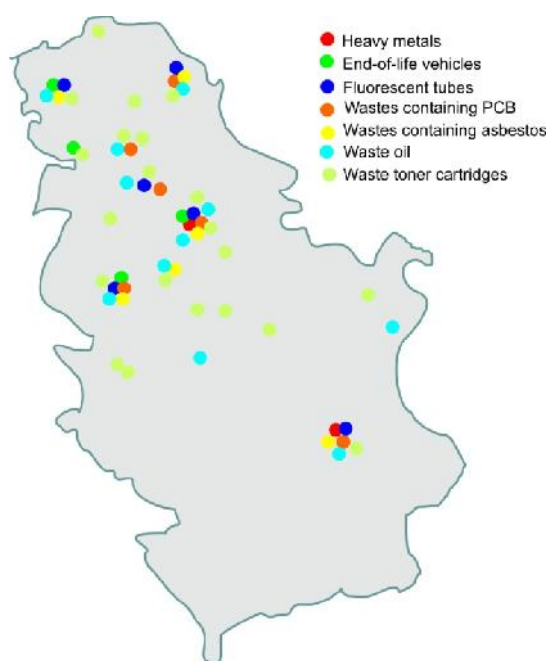

Figure 6 The review of the territorial distribution of operators with licenses for treatment of certain special waste streams

Most companies that deal with waste management are in the different associations. In Serbian Business Registers Agency - SBRA could be found 14 associations of waste management companies. Tables 19-20 in the Appendix present review of the associations in field of waste management.

CONCLUSIONS

Based on the analysis of the current situation in the field of waste management in Serbia and existing companies and associations that are engaged in waste management, it can be concluded the following:

- In Serbia there is no sufficient number of sanitary landfills, as well as for municipal and industrial waste, and that there is no any landfill or hazardous waste.
- None of the three largest cities in Serbia (Belgrade, Nis and Novi Sad), do not have a sanitary landfill.
- In Serbia, there is no sufficient number of certified laboratories for testing of waste (only 8 laboratory), which are unevenly distributed on the territory of Serbia: 5 laboratories

are located in Belgrade, 2 in Novi Sad and one in Bor, while in southern Serbia, there is no any laboratory for testing of waste.

- Of the 2,267 permits for waste management, 2,028 of them have been issued for the collection, transport and storage, which is 89% of the total number of permits. Only 11% of issued permits related to the treatment and disposal of waste.
- Only 35 operators licensed for the disposal of waste, which is a very small number.
- 562 operators have a license for waste treatment. Most operators with permits for waste treatment are located in the Belgrade region (30.60%) and the lowest number of operators is located in the southern Serbia (13.35%).
- When it comes to treatment of hazardous waste, on the basis of the analysis it can be concluded that the majority of operators engaged in the treatment of waste tires (24% operators), and electrical and electronic waste (23% operators). The minimum number of operators engaged in the treatment of waste containing asbestos (2.3%), PCB (2.3%), fluorescent tubes (2.3%), end-of-life vehicles (1.6%) and waste containing heavy metals (1, 1%).
- Operators who deal with treatment of hazardous waste are unevenly distributed on the territory of Serbia.
- The lowest number of operators who deal with treatment of waste tires and waste batteries and accumulators is in the South and Southeast Serbia (11%).
- The largest number of operators who deal with the treatment of WEEE is located in the Belgrade region (45.8%) and the lowest number of operators is located in the southern and southeastern Serbia (5.2%).
- The lowest number of operators who deal with treatment of medical waste is located in the region of Belgrade (only 7%).
- In southern and southeastern Serbia also is the smallest number of operators who deal with treatment of waste oil, used toner cartridge, waste containing asbestos or PCBs, fluorescent light bulbs, waste vehicles and waste containing heavy metals. Most operators located in northern Serbia (Belgrade, Novi Sad, Valjevo, Kikinda and Sombor), and only few of them are located in the south of Serbia, mostly in Nis.
