Report from bleateral meeting P1 and P8 21-22.05.2018	*.v01	23.05.2018	

The meeting of the representatives of VTS Nis (P1) and UKLO (P8) within the WAMPPP, was held at Nis 22.05.2018. The representatives of P1 presented to UKLO partners, the results of the WamPPP in the previous period, as well as planned activities during the final phase of WamPPP project. Also, the participants discussed about results of quality analyzes of the realized activities.

The meeting was attended by: prof. Aleksandra Boričić, prof. Boban Cvetanović, prof. Anica Milošević, Biljana Milutinovic, Petar Djekic (P1) and Prof. Elizabeta Bahetevska, prof. Stojance Nusev, prof. Mitko Kostov and Gordana Janevska (UKLO).

The focus in the first part of the meeting, has been put on results of WP2 A.2.3:

1. Textbook "Economic sustainability of waste treatment" by lec. Biljana Milutinović,
2. "Systems for collecting and transporting waste", by prof. Boban Cvetanovic
3. "Recyclable materials" by prof. Aleksandra Boričić.

The aforementioned literature has passed all the necessary publishing procedures according institutional rulebooks. In this moment, all materials are in the process of printing, while the electronic versions are already available to students.

Also, the representatives of the UKLO have been introduced with realization of accredited Waste Management program at master vocational studies. The realization of the teaching process is currently taking place according to the plan and the program without any major problems, from a quality point of view. Potential problems are expected during the realization of professional practice model due to the small level of interest of industrial partners, as well as the unceasingness of the same to provide a more active and open response to the teaching process.

The UKLO representatives, positively assessed the structure of the curriculum, goals and outcomes and presented their experiences in the implementation of professional practice.

The most part of the meetings were dedicated to the sustainability of the project. The representatives of UKLO presented their experiences from the point of view of the financial sustainability of the study programs and presented their system of distribution of income from tuition and commercialization of professionally teaching staff results. In particular, the importance of developing technical resources and the need for an inter-disciplinary and multidisciplinary approach in releasing programs of this type is particularly emphasized, which requires additional financial investments.

At the end of the meeting, participants discussed the quality of the project management according the analysis of questionnaires result carried out during the meetings and the issues related to the financial aspects of the project implementation.

It has been generally noted that the overall and specific objectives of the project have been set up, to a large extent already achieved and that in the remaining period, work should be done to improve the existing results, and that the plan of project sustainability should already be considered.

Prof Boricic introduced the participants with technical details of final conference of the project, which will be held at the end of September 2018.
