Report activity 6.3	*.fin	24.09.2018	Aproved

In preparation for the development of ICT portals and databases and implementation of developed student industrial placement model, in particular the contacts of PA partners with professionals from the WM field and with the help of non-HEI partners a network among stakeholders in the field of WM WamPPP network was created. Besides the above mentioned aims, WamPPP network present a good tool for rise awareness of whole community about this very importante issue.

Cooperation between the educational institutions on one side, industrial partners, local authorities and citizen, aimed to encourage educators and all other subjects in WM area to continuous exchange of their professional expertise, insights and knowledge, as the basis of their mutual learning and development of our society.

Both public and private sectors are active in management of solid waste in developing countries. There is an emerging trend in encouraging the private sector to enter into solid waste management (SWM) operations, and attempts are being made to formally link the public and private sector operators. Such linkages may improve the efficiency of the entire sector and create new opportunities for employment. However, any change in the present order may inevitably affect the lives of millions of most vulnerable and marginalised population in the cities of the developing counties—both as users and providers of the service. It is worth revisiting the fundamentals of partnerships from the perspective of relevant theories.

Fig 1. Profile of WamPPP Network Memebrs

WamPPP network aim to enable partnership for choice, utilizing vast experience in waste management and citizen services, and leaning on the expertise of dedicated professionals. Network put a focus on cooperation among the municipalities, companies, public and private institutions, over a wide spectrum of services from collection, recycling, treatment and disposal of waste, as well as energy recovery and education. This cooperation have to provide comprehensive services for business/industrial waste management and whole society. Network aim to create a space for building a sustainable, technically sound and financially feasible concept for keeping the communities clean, increase the recycling rate and transform waste into energy, as appropriate. Also WamPPP network has focus on building long term partnerships between all stakeholders.

The WamPPP network aims to bring the potential members closer to the goals of the WamPPP project, raise their awareness of the importance of dissolving the power to initiate their mutual cooperation, exchange of views and joint activities. Members of WamPPP network come from different sectors of economy, and different part of society. All members are part of network on free will and every member can leave the network in any moment without any obstacles

All network members are regularly informed about news in the field of waste disposal, changes to legal regulations, statutory obligations, implementation plans for waste and solutions, as well as campaigns and actions. Also members of the network are informed about training, workshops and seminars from WM area in region and wider. WamPPP network is moderate by National WamPPP Consortium Board NCB. WamPPP network has its rules and propositions with aim to promote its capacities. The membership in network is absolutely free. The members of WamPPP network, can sent a request or ask a help about Waste management issues from other members free of any charges. Also WamPPP network is directly part of WamPPP ICT portal developed as integrative tools. Further the members of network will be able to start common project and campaigns with support of WamPPP consortium board. The teaching staff of partners P1-P5 will coordinate a demands and work of WamPPP network members per regions.

WamPPP network has its Web page on ICT WamPPP Portal. That page consist, list of all members, their information, and area for promotion their activities. Also within the web page there is a advertising area where members of network can advertise free of charges.
